SAGAR MOKASHI

Aspiring Full-Stack Developer
github.com/sagarsmokashi18-tech — +91-7483111040 — linkedin.com/in/sagar-mokashi-636271300

Profile Summary

Computer Science Engineering student skilled in Python and Java programming with experience in developing machine learning and software-based academic projects. Passionate about problem solving and building practical technology solutions.

Education

Bachelor of Engineering (CSE) June 2023 – May 2027
Tontadarya College of Engineering, Gadag

Work Experience

Visvesvaraya Technological University June 2023 – Current

- Developed software applications using Python and Java applying object-oriented programming concepts.
- Built a machine learning-based Fake News Detection system.
- Designed and implemented Smart Placement Companion to assist students in placement preparation.
- Worked with data preprocessing, model implementation, and logical problem solving.
- Maintained project source code using GitHub version control.

Projects

Fake News Detection (Machine Learning)

- Built a Python-based machine learning model to classify news articles as real or fake.
- Applied NLP techniques for text preprocessing and classification.
- Implemented data cleaning and feature extraction for textual datasets.

Smart Placement Companion

- Developed a placement assistance platform to help students track opportunities and preparation activities.
- Implemented structured data handling and modular programming principles.
- Improved accessibility and organization of placement-related information.

Skills

Technical Skills: Python, Java, HTML, Object-Oriented Programming, Machine Learning Basics, Data Handling, GitHub, VS Code, MySQL (Basic)

Soft Skills: Analytical Thinking, Communication, Collaboration, Adaptability, Time Management

Certifications & Achievements

- Certification in Python Programming and problem-solving techniques.
- Gained foundational knowledge in Machine Learning and data analysis concepts.
- Participated in technical workshops and coding-based learning activities.
- Developed machine learning and software-based academic projects.
