PRAVEEN NAREGALLA

+91 - 7795640056

PROFILE SUMMARY

Dedicated CSE student with a solid foundation in programming, database management, and web technologies. Experienced in academic projects involving Python and Django. Quick learner with good analytical and teamwork skills, aiming to contribute effectively in a software development role.

EDUCATION

B.E CSE in Tontadarya college of engineering gadag **July 2023- May 2027**

WORK EXPERIENCE

Academic Project Developer
College Mini Project
Duration: Aug 2025 – Oct 2025

- Developed a Fake News Detection system using Python and Machine Learning techniques
- Collected and preprocessed news dataset for training and testing
- Implemented text classification using Natural Language Processing (NLP) methods
- Applied algorithms such as Naïve Bayes / Logistic Regression to classify news as real or fake
- Evaluated model accuracy and improved performance through feature extraction
- Designed simple user interface for inputting news content and displaying prediction results

---

Major Project – Smart Placement Companion
jan 2026– Present

- Developed web platform to help students prepare for placements
- Used Django framework for backend development
- Implemented features like quiz, notes, and progress tracking
- Managed database and integrated authentication system

Working at YTS Company, assisting in project activities, supporting development tasks, and gaining hands-on experience in a professional work environment.

PROJECTS

Title	Description
Fake News Detection (Machine Learning & NLP)	Developed a machine learning–based text classification model using Python, Scikit-learn, and NLP techniques to identify fake news articles. Achieved approximately 90% accuracy by applying TF-IDF vectorization and classification algorithms such as Naïve Bayes and Logistic Regression. Improved model precision and recall through data preprocessing, stopword removal, and hyperparameter tuning. Implemented a simple user interface for real-time news prediction, enabling automated misinformation detection and supporting digital content verification.

Smart Placement Companion (Full-Stack Web Application)	Designed and developed a full-stack web application using Django, HTML, CSS, and SQLite to assist students in placement preparation. Implemented modules for quizzes, study materials, progress tracking, and user authentication. Improved student engagement by organizing learning resources and enabling performance monitoring. Integrated database-driven backend functionality to ensure secure data storage and efficient content management, enhancing overall user experience and academic preparation efficiency.

SKILLS

TECHNICAL SKILLS –

I have knowledge of programming languages such as Python, Java, C, and SQL, which help me develop applications and solve problems efficiently. I am familiar with web technologies like HTML, CSS, JavaScript, and Django for building web applications and have experience working with SQLite and MySQL databases.

SOFT SKILLS - Problem Solving, Communication, Teamwork, Adaptability, Time Management, Critical Thinking, Leadership

CERTIFICATIONS & ACHIEVEMENTS

- Certified in Python Programming, Web Development, Machine Learning Basics
- Participated in a college-level hackathon, collaborating with a team to design and develop innovative technical solutions within a limited timeframe.
- Participated in explore azure machine learning workspace resources and assets
- Participated in coding events and completed multiple academic projects
- Represented college in ko-ko and table tennis(TT)
