PRAVEEN NAREGALLA

Aspiring Full-Stack Developer

+91 – 7795640056

PROFILE SUMMARY

Computer Science Engineering student skilled in Python and Java programming with experience in developing machine learning and software-based academic projects. Passionate about problem solving and building practical technology solutions.

EDUCATION

Bachelors of Engineering | CSE **July 2023 - May 2027**

Tontadarya College of Engineering, Gadag

WORK EXPERIENCE

Visvesvaraya Technological University | 2024 – Present **June 2022 – Current**

- Developed software applications using Python and Java applying object-oriented programming concepts.
- Built machine learning-based projects including Fake News Detection system.
- Designed and implemented Smart Placement Companion to assist students in placement preparation.
- Worked with data preprocessing, model implementation, and logical problem solving.
- Maintained project source code using GitHub version control.

PROJECTS

Title	Description
Fake News Detection (Machine Learning)	Built a Python-based machine learning model to classify news articles as real or fake using text preprocessing and classification algorithms. Applied Natural Language Processing concepts for analyzing textual datasets. .
Smart Placement Companion	Developed a placement assistance platform designed to help students track placement opportunities and preparation activities. Implemented structured data handling and modular programming principles to improve accessibility and organization of placement information.

SKILLS

TECHNICAL SKILLS – – Python | Java | HTML | Object-Oriented Programming | Machine Learning Basics | Data Handling | Problem Solving | GitHub | VS Code | MySQL (Basic)

SOFT SKILLS - Analytical Thinking | Communication | Collaboration | Adaptability | Time Management

CERTIFICATIONS & ACHIEVEMENTS

- Certification in Python Programming and problem-solving techniques
- Gained foundational knowledge in Machine Learning and data analysis concepts.
- Participated in technical workshops and coding-based learning activities.
- Developed machine learning and software-based academic projects.
- Represented college in ko-ko and table tennis
