PROFILE SUMMARY

Computer Science Engineering student skilled in Python and Java programming with experience in developing machine learning and software-based academic projects. Passionate about problem solving and building practical technology solutions.

EDUCATION

Bachelors of Engineering - CSE July 2023 – May 2027
Tontadarya College of Engineering, Gadag

WORK EXPERIENCE

Visvesvaraya Technological University June 2023 – Current

- Developed software applications using Python and Java applying object-oriented programming concepts.
- Built machine learning-based projects including Fake News Detection system.
- Designed and implemented Smart Placement Companion to assist students in placement preparation.
- Worked with data preprocessing, model implementation, and logical problem solving.

PROJECTS

Fake News Detection (Machine Learning)

- Built a Python-based machine learning model to classify news articles as real or fake using text preprocessing and classification algorithms.
- Applied Natural Language Processing (NLP) techniques for analyzing textual datasets.
- Performed data cleaning, feature extraction, and model evaluation to improve prediction accuracy.
- Tested multiple algorithms to compare performance and optimize results.

Smart Placement Companion

- Developed a placement assistance platform to help students track placement opportunities and preparation activities.
- Implemented structured data handling and modular programming principles for better organization.
- Designed user-friendly features for managing placement updates and preparation resources.
- Focused on improving accessibility and usability of placement-related information.

SKILLS

Technical Skills: Python, Java, HTML, Object-Oriented Programming, Machine Learning Basics, Data Handling, Problem Solving, VS Code, MySQL (Basic)

Soft Skills: Analytical Thinking, Communication, Collaboration, Adaptability, Time Management

CERTIFICATIONS & ACHIEVEMENTS

- Certification in Python Programming and problem-solving techniques.
- Gained foundational knowledge in Machine Learning and data analysis concepts.
- Participated in technical workshops and coding-based learning activities.
- Developed machine learning and software-based academic projects.
